Canon

Installing Your Multifunction to Your Network via the WPS Push Button Method

PIXMA MG5720

Windows

Setup and Installation

Setup and Installation

To use the machine wirelessly with a computer, the printer must be connected to the Wireless LAN and software including the drivers needs to be copied (installed) to the computer's hard disk. Installation time varies depending on the computer environment or the number of application software to be installed.

IMPORTANT
• Log on as the administrator (or a member of the Administrators group).

• Quit all running applications before software installation.

• Do not switch users during the installation process.

• Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.

• It may be necessary to restart your computer during the installation process. Follow the on-screen instructions.
. The installation resumes once your computer has restarted.

• If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.

Connecting to the Wireless LAN

1. From the **Home** screen, press the up or down arrows until **LAN settings** appears. Then press the function key underneath it.

Connecting to the Wireless LAN
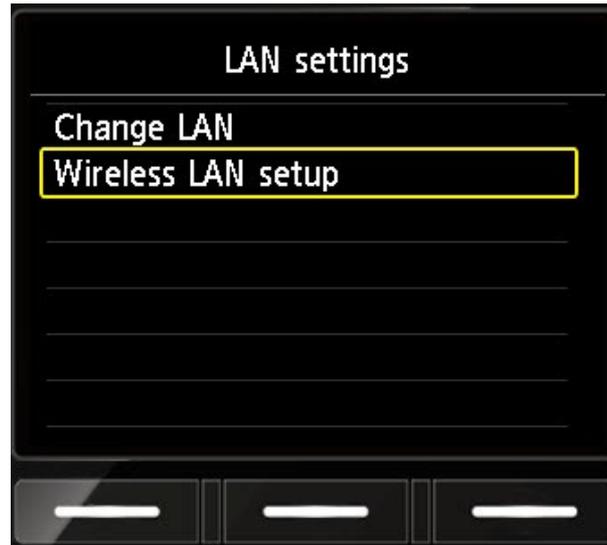

2. Use the down arrow to select **Wireless LAN setup** and press **OK**.

Connecting to the Wireless LAN

4. Press **OK** on this message.

Connecting to the Wireless LAN
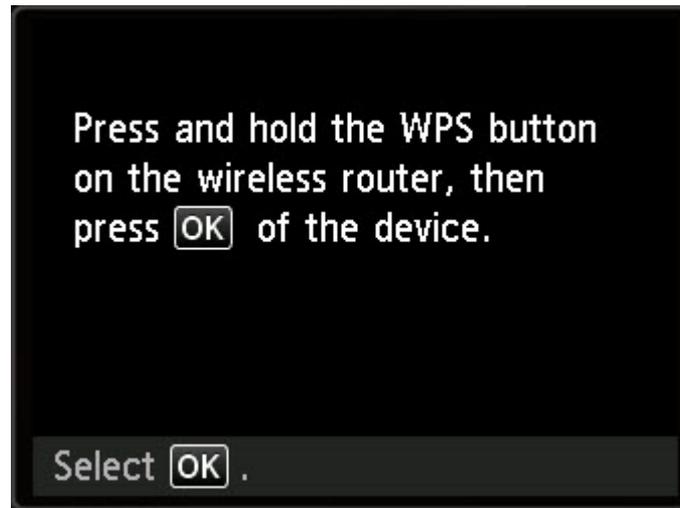

5. Press and hold the WPS button on your wireless router for 5 seconds. Then, press **OK** on this message.

Connecting to the Wireless LAN
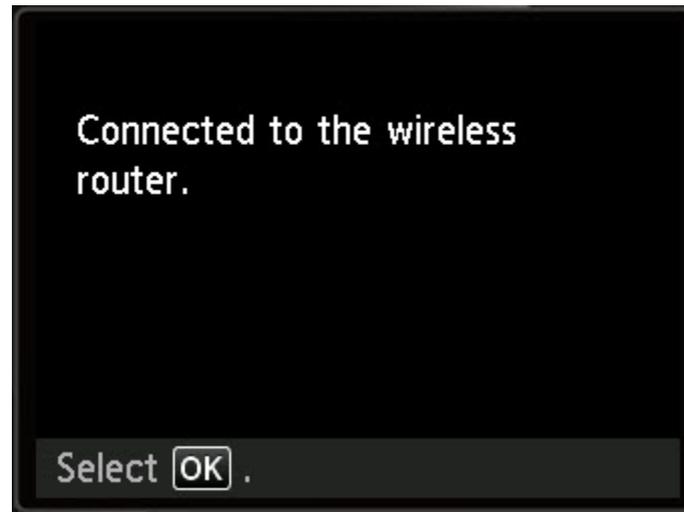

6. The printer will attempt to connect to the wireless LAN. Upon a successful connection, this screen will appear. Press **OK** and proceed with installing the software.

Insert the Setup CD-ROM into your computer.*

Click [Run Msetup4.exe] on the AutoPlay screen, then click [Yes] or [Continue] on the User Account Control dialog box.

If the CD-ROM does not autorun:
Double-click [(My) Computer] > CDROM icon > [MSETUP4.EXE.]

*If you don't have or cannot use the Setup CD-ROM, follow the steps below to start the setup.

- Download the software (click the link to download)
- Double-click the downloaded .exe file (win-mg5700-1_0-jucd.exe)

If the **User Account Control** dialog box appears during the setup, click **Yes** or **Continue**.

Connecting to the Wireless LAN

Click **Start Setup** on the initial screen.
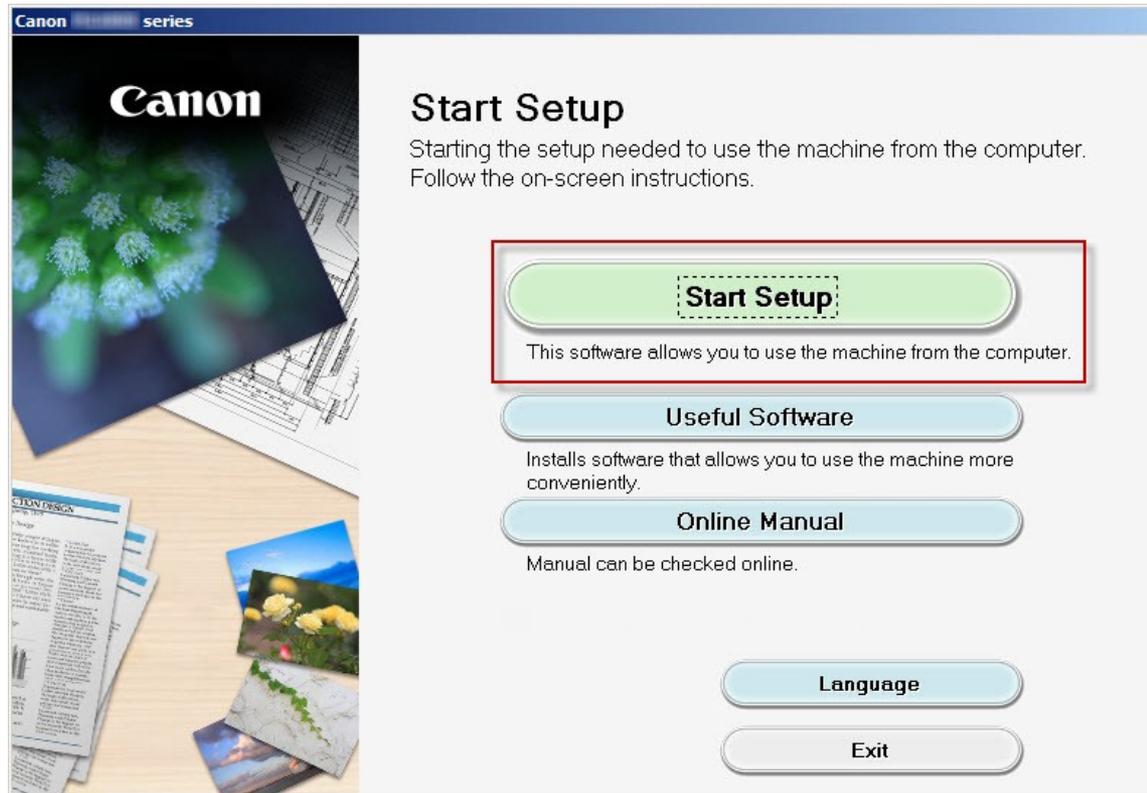

Connecting to the Wireless LAN
