EOS 50D Firmware Update Procedures

Precaution

- A power failure during the firmware writing operation may disable the camera.
 - > Use a fully charged Battery Pack or dedicated AC Adapter Kit (Optional) for the firmware update.
 - > Do not shut off the power during the firmware writing operation.
 - > Do not open the card slot cover during the firmware writing operation.
- Do not press any camera buttons during the firmware writing operation.

Firmware Update Procedures

In the following instructions, x.x.x. indicates either the current firmware version or the firmware version for the update.

(1) Prepare the items required to update the firmware.

- 1. Camera body
- 2. Dedicated Battery Pack (The battery pack must be fully charged) or dedicated AC Adapter Kit (Optional)
- 3. CF card (64MB or more, 64GB or less)
- 4. Firmware update file (you can download it from Canon's Website.)

(2) Create the firmware update file.

- 1. Download the zipped self-extracting file from Canon's Website.
- 2. Extract the downloaded file, and create the firmware update file.
 - How to Extract the Firmware Update File

Windows

When you double-click the downloaded file, the following screen appears. Click [OK], and the downloaded file will be extracted, and the firmware update file created.

elf-Extracting Archive		×
Extract to:		
C:V		Browse
	Cancel	ОК

Macintosh

The downloaded file will automatically self-extract, creating the firmware update file. In case the downloaded file does not automatically self-extract, double-click the downloaded file.

- 3. Check the name and size of the firmware update file by comparing it to what is listed on the website. If the file size does not match, then download the firmware update file again.
 - How to Confirm the File Size

<u>Windows</u>

Right-click the icon of the firmware update file and select the [Properties] command from the pop-up menu that appears.

<u>Macintosh</u>

Select the icon of the firmware update file, and then select the [Get Info] command from the [File] menu.

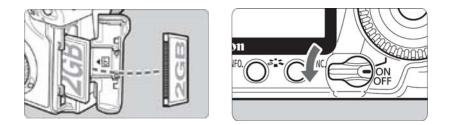

In case of using the CF card reader, follow the procedure from Step (3) onward. In case of not using the CF card reader, follow the procedure from Step (4-1) onward.

(3) Copy the firmware update file to the CF card.

- 1. Insert a CF card that has been formatted in the Camera into the CF card reader.
- 2. Copy the firmware update file to the first window that appears when the CF card is opened (the root directory).
- 3. Remove the CF card from the card reader.

*When removing the CF card, be sure to do so as described in the documentation for the computer or the card reader. *If the firmware update file is placed in subfolder of the CF card, the camera will not see it.

- 4. Rotate the Mode Dial to select <P> mode (or one of the other modes in the creative zone).
- 5. Insert the CF card with the firmware into the camera.
- 6. Turn the Power Switch <ON>, and then press the <MENU> button to display the menu.

7. Rotate the Main Dial and the Quick Control Dial to select the "Firmware Ver.x.x.x" item at the bottom of the "Set-up 3 (Yellow)", and then press the <SET> button.

8. The firmware update screen will appear.

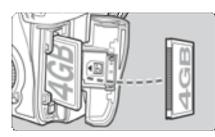

Turn the Quick Control Dial, select [OK], and then press the <SET> button. Follow the procedure from Step (5) onward.

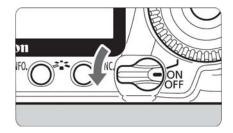

*If the firmware update screen does not appear on LCD monitor, the firmware update file may not have been properly copied to the CF card, so please try again starting from step (1).

Firmware update	
Current versi Upda	
Cancel	OK

(4-1) Connect the camera and the computer.

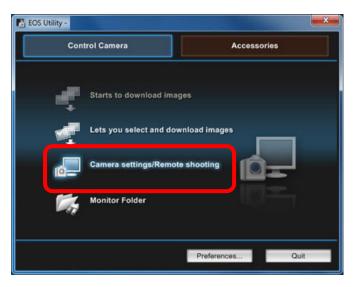

- 1. Rotate the Mode Dial to select <P> mode (or any mode other than Fully-Automatic Modes).
- 2. Insert a CF card that has been formatted in the camera into the camera.
- 3. Connect the camera and the computer with the USB cable, and then set the camera's power switch to <ON>.

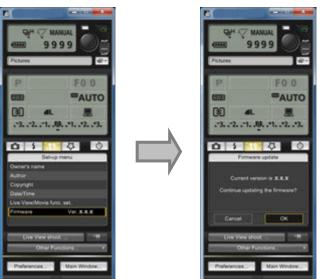

(4-2) Start the firmware update.

- 1. Start EOS Utility.
- 2. Click the [Camera settings / Remote shooting] button.

- 3. Click [**111**], and then click the [Firmware Ver. X.X.X].
- 4. The firmware update screen will appear on the computer screen. Click [OK].

- 5. A window for selecting files appears, so select the firmware update file, and then click [Open].
- 6. A confirmation window appears, so click [OK].

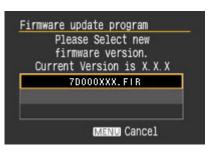

7. A window with cautionary messages about the update appears, so click [OK].

EOS Utility	×
To start the update, press the SET button on the camera. Watch the status on the back monitor of the camera and do not camera until the update is complete. Do not press camera buttons during the update. After the update, restart the camera to complete the update pro	
	ОК

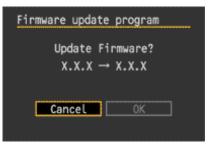

8. Follow the procedure from Step (5) onward on the camera.

(5) Update the firmware.

1. The screen will appear on the camera's LCD monitor.

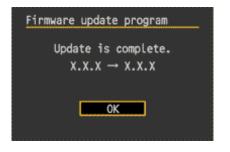

2. If you press the <SET> button, a confirmation screen will appear, so check the firmware update shown, rotate the Quick Control Dial to select [OK], and press the <SET> button again to start the firmware update.

3. The message will appear during the update.

- 4. When the update is completed, the message will appear on the camera's LCD monitor.
- 5. Complete the firmware update by pressing the <SET> button.

The firmware update is now completed.

When the firmware update operations are finished, turn the camera <OFF> and remove battery from the camera for at least two seconds. This will cause the new firmware to take effect after the battery has been reloaded and the camera is turned on.

Format the CF card before using it again.

Verifying the firmware Version

- 1. Turn the Power Switch <ON>, and press the <MENU> button.
- 2. Rotate the Main Dial and the Quick Control Dial, and you will see the "Firmware Ver.X.X.X" at the end of the settings shown in "Set-up 3 (Yellow)".
- 3. This is the currently installed firmware version number.

Clear settings	
Firmware Ver	. X.X.X

Note: Select P mode (or one of the other modes in the creative zone). The version of the firmware will not appear in the basic zone.

If an ERROR message appears during the firmware update

If this screen appears, remove the battery and check to make sure that there are no problems with the battery capacity or with the firmware update file on the CF card.

If there are no problems, repeat the update operations again.

If the problem persists, please contact the Canon Customer Support Center in your region.
