

This process may take several moments. The printer will shut down, and the following message will be displayed.

The screenshot shows the 'Printer Update Utility' window at Step 1. On the left, a vertical list of steps shows 'Step 1: Preparing for updating the printer functions' as the active step, with 'Step 2: Updating the printer functions' and 'Step 3: Completing the update process' below it. The main area contains the following fields and progress indicators:

- Printer name:** TS5100 series
- Current software version:** 1.020
- Update software version:** 1.100
- Data transfer process:** A progress bar showing 0% to 100(%) with the needle at 0.
- Data overwrite process:** A progress bar showing 0% to 100(%) with the needle at 0.
- Status box:** A large white box containing the text 'Preparing for transferring. Please wait...'.

At the bottom, there are three buttons: 'Cancel', 'Back', and 'Start'.

The updated firmware will be transferred to the printer.

The screenshot shows the 'Printer Update Utility' window at Step 2. The left sidebar now highlights 'Step 2: Updating the printer functions'. The main area contains the following fields and progress indicators:

- Printer name:** TS5100 series
- Current software version:** 1.020
- Update software version:** 1.100
- Data transfer process:** A progress bar showing 0% to 100(%) with the needle at 0.
- Data overwrite process:** A progress bar showing 0% to 100(%) with the needle at 0.
- Status box:** A large white box containing the text 'Transferring data to the printer...'.

At the bottom, there are three buttons: 'Cancel', 'Back', and 'Start'.

The firmware will then be updated.
